

ZAFFIRO INTERNATIONAL

BUSINESS PROFILE

ABOUT ZAFFIRO INTERNATIONAL

Zaffiro International is a wholly indigenous Oil & Gas Servicing Company, we specialize in providing oil & gas services. Our area of expertise is predominantly in oil and gas upstream, midstream and downstream sector.

Zaffiro international was incorporated on the 31st day of January 2008 with Rc No. 728460. Encompassing complete lifecycle management of all refineries, offshore, onshore and subsea projects.

The company has pooled the expertise of highly qualified and experienced engineers, technicians and other support personnel to provide total quality service to our clients and the industry, our delivery on projects has been excellent and remarkable, and our cutting edge technology in the industry has been the game changer.

Zaffiro international will and determination in providing an environmental friendly company has placed us on the fore front of the industry competing positively with the multinationals.

Zaffiro International, safety is not only a watchword, it is a habit. Meeting safety standards in all areas of operation is a commitment that is never compromised. Our equipment and tools are sourced from the world's best manufacturers.

The staff of Zaffiro International are driven by excellence and fully committed to satisfying the needs of our clients through quality service delivery. Our inspiration is in our determination to redefine the standard of service delivery through the state-of-the-art equipment, tools, and techniques that we deploy for operation.

Through re-engineering, strategic repositioning, corporate venturing, technical and marketing alliances, Zaffiro International is focused on establishing, maintaining the lead in some key areas of Procurement and logistics, Oil field supply, Maritime Services, Research and Development, Drilling and Fabrication of pipes, Inspection Services, Training, Human Resources etc. And with emphasis on asset-based technical and rentable equipment, tools and units.

In the dynamic Nigerian Oilfield/Well Engineering environment, Zaffiro International seeks to offer the maximum benefit that is achievable from any field development project by bringing together the powerful combination of leading-edge Equipment/Tools, technical expertise and high performance standard / track record.

Vision Statement

is to become the most preferred indigenous oil and gas company in Africa and beyond, impacting positively on our clients and environment by using significant high quality equipment that will lead innovation and technology in our new world

Mission Statement

"Our mission is to innovate to a world class oil and gas company, providing excellent services by adding value to our clients and the oil industry, providing unbeatable technology that is efficient and delivers within record time.

Our Objectives

Our aim is to broaden and deepen indigenous service capabilities and portfolios in oil and gas industry and our goal is to become the foremost indigenous oilfield service provider in the years ahead.

Our Objectives

Zaffiro International is proud of its products and services, its history and the entrepreneurial spirit that has moved the company forward since 2008. Our company attaches great value to continuity; we look to the long term. In doing so, the members of staff of Zaffiro International Ltd are driven by excellence and fully committed to satisfying the needs of our clients through quality service delivery. We constantly focus on our clients and their ambitions; we are customer-oriented. We are a strong, global company in the Industry. With our international distribution network with expert people and specialist knowledge we are connected worldwide with our markets, customers and suppliers. Just like our tag line says "YOUR DESIRE IS OUR INSPIRATION"

Our Ambitions

We are driven in our ambitions and in our evolution by what markets and customers require from us, now and in the future. Zaffiro International has increasingly revolved into a service-oriented business, directed at specific markets and customers on the one hand, and on large projects with partnerships and customization on the other hand. We reinforce our leading market positions through organic growth and acquisitions, as well as through continually strengthening and broadening our product portfolio, service delivery and international organization. Our acquisitions are focused on areas in which we do not yet have any in-house specialisms, or on geographical areas where we do not yet have a strong presence and want to enlarge our footprint.

Our Culture

QUALITY ASSURANCE

Quality has priority in the services we provide to our customers. As a consequence, we globally devote a great deal of attention and time to the continuous improvement of our work processes, in which the quality of our product range and safe and healthy working conditions are a priority. Sustainability plays a key role in the design of our processes.

Quality management is an integral part of our organization, ranging from our strategic objectives up to and including our operational processes. This makes it possible to add value for the customer in every step of our operation. An important part of this process, for example, is the strict selection and control of our suppliers. This standard is not only proof of our comprehensive process control, it also represents a step forward in controlling potential risks.

We set high quality standards for ourselves that are translated in terms of annual objectives to be achieved in this field. We regularly monitor progress in this area on the basis of Key Performance Indicators. Internal audits are regularly conducted for the purpose of verifying implemented actions.

TEAM WORK

Zaffiro International create a productive work environment for her staffs as success is our key word, and our team does not regard Service Quality improvement as a program, but rather as a holistic organization design process that requires

dedication and endurable commitment as a fundamental culture from management and Employee alike.

Zaffiro International create a productive work environment for her staffs as success is our key word, and our team does not regard Service Quality improvement as a program, but rather as a holistic organization design process that requires dedication and endurable commitment as a fundamental culture from management and Employee alike.

The success that each individual team members defined in a personal habit of continuously improving performance every day. Nothing less will do.

Everything we do touches people, and adds meaning to our own lives and work. Each self-directed team demonstrates a deep commitment to the initiative. At Zaffiro International the buck stops at every table.

TIMELINESS

It is known that people who care about the customer and who communicate in an honest timely fashion inhabit our organization.

Our standard is to save time and resources for our customers.

We give our customers what they want in time, and each member of our team has a mandate to commit to that standard. Our integrity and consistency have remained unquestioned. We take your patronage seriously, knowing that it represents your confidence in us.

HOW WE PRACTICE SAFETY EVERYDAY

WORKING SAFELY: A CORE VALUE

Nothing is also important that it cannot be done safely. Safety is a core value at Zaffiro International and the success of every activity we undertake is measured on our ability to execute our work safely every day. Our employees and contractors strive to ensure our services occur without incident or harm to our people, communities and the environment every day. Safety is just simply a part of the way we work.

Our Executive Leadership Team is fully committed to supporting a safe workplace by providing employees and contractors with clear expectations about:

- Safety awareness
- Consistent work practices
- Proactive hazard identification
- Rigorous risk mitigation, especially for non-routine work
- Recognition and support for safety performance
- Ongoing safety training and resources

Occupational Health & Industrial Hygiene

The health and safety of our employees and contractors is our top priority. At Zaffiro International, we are committed to anticipating, recognizing, evaluating and controlling workplace environmental health hazards that may cause illness or impair the well-being of our employees, contractors or the community members who live or work near our operations.

Promoting Healthy Work Environments

We have developed an occupational health management program that works to promote healthy work environments, protect the health and well-being of employees and prevent occupational injuries and illnesses. This system assesses and manages individual and work environment health risks, and organizational health issues that may pose a risk to our business (i.e. transmittable diseases).

We have also established an industrial hygiene management program that anticipates, recognizes, evaluates and controls workplace environmental health hazards or stressors. The components of this program include: hazard identification and monitoring, risk evaluation, control plan development and implementation, employee training and evaluation of controls.
